1. Install through iPhone

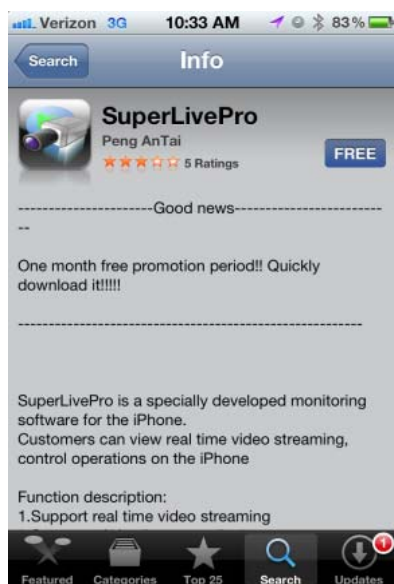

To make mobile surveillance, first enable network service on the DVR and refer to Chapter 4.6 “Network Configuration” in DVR User Manual. Below are the instructions for mobile client.

Step 1: Open App Store function of iPhone

Step 2: Enable “search”  function to search “SuperLivePro”. “SuperLive” is the free app; however, the functions are limited.

Step 3: Click SuperLivePro and install the application.

Step 4: Input iTunes Store password and then click “OK”. The software will be installed automatically.

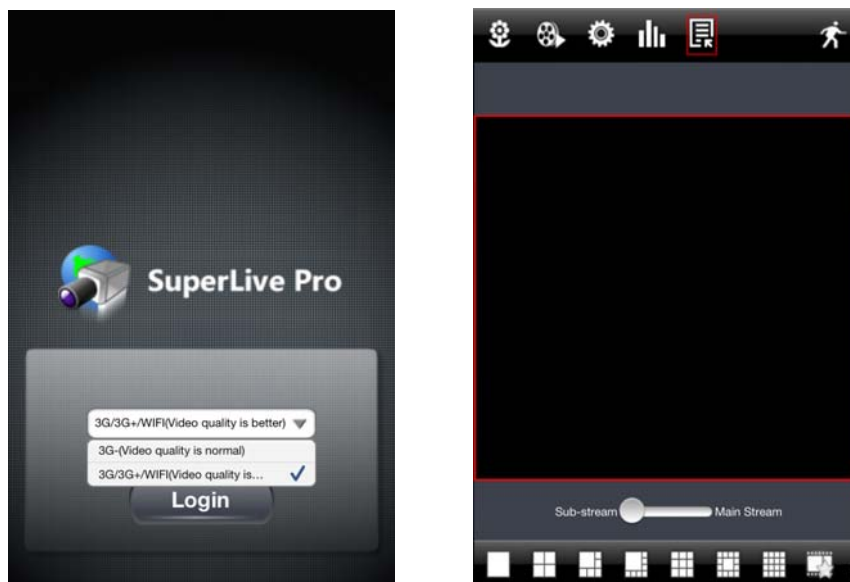

Note: If it is the first time for a user to operate, please enter user ID. If there is no Store account, user needs to apply for one.

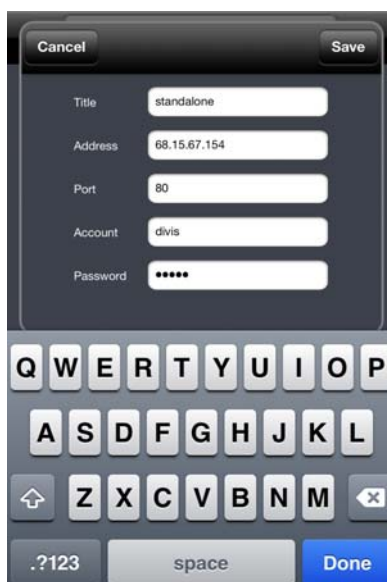

2. Login Interface

Step1 : Select one of those options if you have WIFI connection, then try to click second option.

Step2 : You will see blank page if this is your first to login. Try to click “Serverlist” on top menu bar. Then you will need to click “add” button.

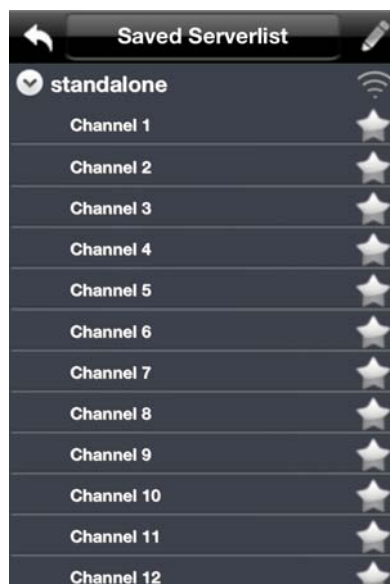

Step3 : Input standalone information with Account ID and Password. Then click “save” button.

Step 4 : You will find the title you just added on the list. Then go back to first page.

Step 5: Try to hit the blank page then you will be able to see the server list you just added.

Step 6: Try to click channel which you want to see, then the mark will be changed to gold color.

3. Main Interface
